

Veterinary Care Solutions:

Veterinary Hospitals | Emergency Veterinary Care | Livestock Medicine
 Equine Medicine | Zoos | Sanctuaries

Don't let liability come back to bite you.

Protecting oneself and others against zoonotic disease is a significant concern for any veterinary practitioner. All generated biomedical waste, including sharps and red bag waste from veterinary care, must be properly processed to protect public health and the environment. The Demolizer® II provides the ideal point-of-generation disposal solution.

Save money while safely, simple and securely processing your waste on-site

Using the Demolizer® II, you can properly dispose of sharps and red bag waste right at your facility with the touch of a button. A simple three-step operation safely and simply processes biomedical waste into sterile, non-infectious waste that is safe for the common trash. The technology meets CDC and EPA recommendations for treatment and is consistent with the requirements under the OSHA Bloodborne Pathogen Rule. The Demolizer® II is approved or meets requirements for treatment in 47 states.

Make liability concerns a thing of the past

Whether you know it or not, you are responsible for your biomedical waste - even after it leaves your facility. Trusting the disposal of these materials to someone else can potentially result in a costly problem. Eliminate your liability by processing your sharps and red bag waste on site with the cost-effective Demolizer® II waste management system.

Savings:	<ul style="list-style-type: none"> ● no special facility requirements ● low capital expense ● no storage or hauling expenses
Safety:	<ul style="list-style-type: none"> ● one-hand sharps disposal ● bacteria free emission ● ambient external operating temperature ● sterile, non-hazardous solid waste end product
Simplicity:	<ul style="list-style-type: none"> ● easy three-step operation ● process BOTH sharps and red bag waste ● compliance documentation generated automatically
Security:	<ul style="list-style-type: none"> ● eliminates cradle-to-grave liability* ● waste is sterile and non-biohazardous ● better for the environment - nothing is incinerated and no biohazardous byproducts enter our environment

*When used properly, the Demolizer® II system eliminates waste generator "cradle-to-grave" liability under the Resource Conservation and Recovery Act.
