

U.S. Military Continues to Recognize the Demolizer® II Benefits by Expanding the Application to Altus Air Force Base

BioMedical Technology Solutions Holdings, Inc. (OTCBB:BMTL)

ENGLEWOOD, CO (3-9-2010) -- BioMedical Technology Solutions, Inc. (“BMTS”) is pleased to announce that it has placed the Demolizer® II System at Altus Air Force Base, the home of the 97th Air Mobility Wing in Southern Oklahoma. This expands on the use of the Demolizer® technology at U.S. military bases for the onsite treatment of sharps and typical red bag waste. The Demolizer® II provides a simple, safe and environmentally friendly means to manage medical waste generated in support of the deployment, training and care of U.S. military personnel.

The Demolizer® II delivers long term cost advantages compared to traditional hauling options and improved personnel safety and base security since hauling trucks will no longer need to pass through gates and checkpoints. Because BMTS’ onsite treatment system does not use harsh chemicals, requires very little energy, and eliminates the negative environmental impacts of traditional waste hauling and large-scale processing options, the Demolizer® II fits well with the Air Force’s “Green Initiative”. For these reasons, BMTS expects to expand product placement at U.S. military bases across the country over the coming months.

About BioMedical Technology Solutions Holdings, Inc.

BioMedical Technology Solutions Holdings, Inc., located in Englewood, Colorado sells the Demolizer® II through its wholly owned subsidiary BioMedical Technology Solutions, Inc. BMTS’ patented Demolizer® Technology converts infectious biomedical waste into non-infectious material. BMTS’ products provide biomedical waste treatment solutions for the over 1,000,000 low to medium volume medical waste generators in the US and a global market five times larger than the US. For more information, visit www.bmtscorp.com or call 866-525-2687.

About the Demolizer® II

The Demolizer® II is the GREEN alternative to biomedical waste disposal. The device is the only patented, portable, and self-contained system able to process both sharps and typical red bag biomedical waste onsite. The processed waste is rendered sterile and discarded as common trash eliminating up to 100% of the cost associated with its disposal. The Demolizer® II meets or exceeds all EPA and CDC guidelines and is approved or meets treatment requirements in 47 states after review by 78 governmental agencies. The device uses no chemicals or liquids, plugs into a normal outlet through a surge protector, and automatically records and prints state required documentation. The Demolizer® II provides a safer, more environmentally GREEN method for biomedical waste disposal.
