BioMedical Technology Solutions Holdings, Inc (otcbb: bmtl) Launches New Sales and Marketing Company, HealthCare Sales Professionals (HCSP)

Mon Feb 23, 2009 12:46pm EST

DENVER--(Business Wire)--

BMTS Holdings, Inc launches a new sales and marketing company -Healthcare Sales Professionals (HCSP). HCSP is a unique "hybrid" sales and marketing organization designed to represent domestic and international manufacturing partners and their products in the U.S. Healthcare markets. HCSP will support BMTS and their manufacturing partners in facilitating sales, customer support, market data, reporting and technical service in all of the four major healthcare sectors (medical, dental, long term care and veterinary). HCSP has the unique ability to engage traditional distribution channels or sell directly to the end user. By using BMTS's established industry relationships with the top distribution organizations in the U.S. and their proprietary in house database consisting of over 1 million end user records, HCSP will capture market share, introduce new products, and drive results for BMTS and their manufacturer clients.

HCSP's initial product portfolio consists of the Demolizer II; the unique, cost-effective system for over one million low to medium volume medical waste generators. HCSP is also the exclusive manufacture representative for the elexxion claros nano laser in the U.S. and Canada. Patterson Dental, one of the two largest U.S. dental distributors, has an exclusive distribution agreement with elexxion in the U.S. and Canada. This agreement, along with the Demolizer II, brings instant creditability to the HCSP model and provides for a balanced triangular relationship. HCSP plans to add three additional product lines by Q3 2009.

Josh Killian, Patterson Dental's Director of Capital Equipment remarked, "What is exciting about elexxion's new partnership with HCSP is that they will be able to take advantage of HSCP's internal Commerce Calling Sales Professionals to help generate leads as well as offer important post sales technical support."

HCSP's business model combines a team of Integrated Sales Professionals to cover the United States and 35 Commerce Calling Sales/Support professionals. HCSP will continue to add to their sales organization throughout 2009. HCSP extensive technical and clinical training for their sales team will set a new standard for the industry.

"We have been developing HCSP since July of 2008 and are very pleased with the initial launch in January. The model works by allowing us the opportunity to deliver a higher standard of sales, support, and service to all three components that make up our industry; manufacturing, distribution, and the most important of all, the customer." Stated Don Cox, President and CEO of BMTS Holdings, Inc.

About BioMedical Technology Solutions Holdings, Inc.

BioMedical Technology Solutions Holdings, Inc. (www.bmtscorp.com), located in Englewood, Colorado sells the Demolizer II through its wholly owned subsidiary BioMedical Technology Solutions, Inc., that converts infectious biomedical waste

into non-biohazardous material using the patented Demolizer II technology which it owns. BMTS's products provide biomedical waste treatment solutions for the over one million low to medium volume medical waste generators in the U.S. and a global market five times larger than the U.S. For more information, visit www.BMTScorp.com or call 866-525-2687.

About The DemolizerII

The DemolizerII is the GREEN alternative to biomedical waste disposal. The device is the only patented, portable, and self-contained system able to process both sharps and red bag biomedical waste onsite. The processed waste is rendered sterile and discarded as common trash eliminating up to 100% of the cost associated with its disposal. The Demolizer II meets or exceeds all EPA, CDC, state, and local guidelines and is authorized for use in 47 states by 78 governmental agencies as an optional disposal system. The device uses no chemicals or liquids, plugs into a normal outlet through a surge protector, and automatically records and prints state required documentation. The Demolizer II provides a safer more environmentally GREEN method for biomedical waste disposal.
