

U.S. Department of Veteran Affairs Continues to Recognize the Demolizer® II Benefits by Expanding the Application to America Samoan Facilities

BioMedical Technology Solutions Holdings, Inc. (OTCBB:BMTL)

ENGLEWOOD, CO (7-7-10) -- BioMedical Technology Solutions, Inc. (“BMTS”) is pleased to announce that it is placing an additional Demolizer® II System in American Samoa representing its third placement in the past 30 days within the V.A. Health Network. The Demolizer® II provides a simple, safe and environmentally friendly means to manage medical waste generated in support of the care of U.S. veterans.

“With 153 large medical centers and over 700 outpatient centers, the V.A. represents an excellent opportunity for our company,” says Don Cox, BMTS’ President and C.E.O. “The placement of the third system in a short period of time represents a natural progression within the V.A. Health Network. This also further validates our plans to expand into the government and military markets.”

The Demolizer® II delivers long term cost advantages compared to traditional hauling options and improved personnel safety and facility security since hauling trucks no longer need to enter V.A. facilities. For these reasons, BMTS expects to expand product placement at V.A. facilities and outpatient clinics over the coming months.

About BioMedical Technology Solutions Holdings, Inc.

BioMedical Technology Solutions Holdings, Inc., located in Englewood, Colorado sells the Demolizer® II through its wholly owned subsidiary BioMedical Technology Solutions, Inc. BMTS’ patented Demolizer® Technology converts infectious biomedical waste into non-infectious material. BMTS’ products provide biomedical waste treatment solutions for the over 1,000,000 low to medium volume medical waste generators in the US and a global market five times larger than the US. For more information, visit www.bmtscorp.com or call 866-525-2687.

About the Demolizer® II

The Demolizer® II is the GREEN alternative to biomedical waste disposal. The device is the only patented, portable, and self-contained system able to process both sharps and typical red bag biomedical waste onsite. The processed waste is rendered sterile and discarded as common trash eliminating up to 100% of the cost associated with its disposal. The Demolizer® II meets or exceeds all EPA and CDC guidelines and is approved or meets treatment requirements in 47 states after review by 78 governmental agencies. The device uses no chemicals or liquids, plugs into a normal outlet through a surge protector, and automatically records and prints state required documentation. The Demolizer® II provides a safer, more environmentally GREEN method for biomedical waste disposal.
