

BioMedical Technology Solutions, Inc.'s Demolizer II debuts with Royal Dental Group
BioMedical Technology Solutions Holdings, Inc. (OTCBB:BMTL)

BioMedical Technology Solutions, Inc. ("BMTS") and Royal Dental Group debuts new cabinet design at the 2009 Chicago Midwinter Dental Convention.

Royal Dental Group, the leading custom cabinet manufacturer in the US dental market designed a special cabinet module for the Demolizer® II in their Biotech Sterilization Centers.

Howard Sorenson, Vice President of Sales for Royal Dental Group explains, "When we design Sterilization Centers for dental offices, our main objective is to improve the productivity, organization, and safety of the staff when processing contaminated instruments. We accomplish this through intelligent design and the systemization of tasks that are preformed in this vital area of the dental office. The Demolizer® II fits these criteria by handling a pressing need in the dental office by disposing of the biomedical waste materials that are produced in the office. The Demolizer® II eliminates the need for storage and third party pick up of these materials by reducing them to an inert material that can be disposed of like common trash. The positive impact on the staff and patient through safety, simplicity, better utilization of time and reduced costs are essential to a well run dental office's sterilization program."

"We are extremely excited for the opportunity to work with Royal Dental Group", said Don Cox, President and CEO of BMTS Holdings, Inc, further stating "to be featured by Royal Dental Group in their Sterilization Centers further validates the need for the Demolizer® II in the dental market as well as all medical markets. With over 140,000 dentists and approximately 2,000 plus new or remodeled dental offices being built each year in the US, we look forward to working with Royal Dental Group, educating dentists and their staff on maintaining a safer, simpler, more secure practice while saving money and the environment."

About BioMedical Technology Solutions Holdings, Inc.

BioMedical Technology Solutions Holdings, Inc., located in Englewood, Colorado sells the Demolizer® II through its wholly owned subsidiary BioMedical Technology Solutions, Inc., that converts infectious biomedical waste into non-infectious material using the patented Demolizer II® Technology which it owns. BMTS' products provide biomedical waste treatment solutions for the over 1,000,000 low to medium volume medical waste generators in the US and a global market five times larger than the US. For more information, visit www.bmtscorp.com or call 866-525-2687.

About the Demolizer® II

The Demolizer ® II is the GREEN alternative to biomedical waste disposal. The device is the only patented, portable, and self-contained system able to process both sharps and red bag

biomedical waste onsite. The processed waste is rendered sterile and discarded as common trash eliminating up to 100% of the cost associated with its disposal. The Demolizer® II meets or exceeds all EPA, CDC, state, and local guidelines and is authorized for use in 47 states by 78 governmental agencies as an optional disposal system. The device uses no chemicals or liquids, plugs into a normal outlet through a surge protector, and automatically records and prints state required documentation. The Demolizer® II provides a safer, more environmentally GREEN method for biomedical waste disposal.
